

PNG DIA SOLUTIONS

DEDICATED INTERNET ACCESS

PowerNet Global's Dedicated Internet Access (DIA) provides a high-speed solution for businesses that require high-performance and full-time dedicated Internet access.

The DIA services provided by PNG are expertly engineered to offer a wide variety of bandwidth increments, access methods, and billing options that can be customized for each business.

PRIVATE LINE ACCESS

Every business has their own unique set of needs that must be met. That's why PNG also offers Private Line access as an alternative to traditional DIA. This service allows two locations in the continental U.S. to be directly connected with a dedicated point-to-point circuit that transmits voice or data.

MANAGED CPE SERVICE

PNG's Managed CPE Service is a low-cost feature that allows businesses to focus on their business without worrying about the health and performance of their Internet connections.

Key Features:

- Router configuration with plug-and-play installation
- 24x7x365 monitoring for uptime, latency, and packet loss
- Online reporting and immediate problem resolution
