

PNG DEDICATED VOICE SOLUTIONS

DEDICATED VOICE

Whether it's a call across the state or the nation, PowerNet Global's Dedicated Voice service will deliver. By installing a dedicated long distance T1 through PNG, customers are able to dial long distance calls directly into the network, ensuring reliability and security that provides seamless communications that businesses expect and demand.

The biggest advantage of PNG's Dedicated Voice service is its affordability. Because the dedicated circuits allow calls to bypass local routes, there are less communications charges associated with the call and PNG is able to pass the savings on to you.

For customers who do a large volume of inbound or outbound calling, a long distance T1 is a cost-saving solution.

Key Features:

- Carrier diversity
- Multiple signaling and protocol
- Online quoting and ordering

INTEGRATED ACCESS

Integrated Access combines long distance and Internet service on one single T-1 line making it an ideal solution for small to medium businesses looking to boost efficiency in a cost-effective manner. You can deliver real values for your business with high-speed Internet and lower long distance rates.
