PowerConference

On Demand Conference Calling

PowerConference brings simplicity and convenience to conference calling. Your business can bring multiple people together on the same call to hold productive and cost-efficient voice conferences. Starting a call is as simple as dialing a private 800 number and entering the secure Moderator PIN Code. Participants join by dialing the same 800 number and entering the participant PIN Code and the conference call begins.

PowerConference eliminates the hassle of sign-up fees, monthly commitments, or cancellation charges. Your call times are unlimited, and our 24 hour technical support team will be there if you have any questions. PowerConference is available 24 hours a day, 7 days a week with no reservations or scheduling required.

PowerConference delivers tools to help you manage your call and get the most out of each meeting. Security, call recording, volume control, and entry/exit tones are just a few of the features included on your PowerConference account.

Benefits

- Constant availability without scheduling or operator assistance.
- Works the way you need it to - without complication.
- Enhance your company's bottom line by reducing travel expenses
- Helpful representatives there when you need them
- Forget set-up charges, monthly commitments, cancellation fees, time limits, and higher per minute rates
- Archive your call for review or share with those unable to attend
